

Science Lesson 1 Tuesday 21st April:

In Science we would have been focusing on the topic 'animals including humans'. The first lesson will be observing eggs hatching. Children should learn and understand the development of a chick in egg to chick to hen by the end of the lesson.

Activity 1:

Predict what it will be like when a chick hatches from an egg.

Activity 2:

Watch YouTube video:

<https://youtu.be/F38tIGO5TFY>

Activity 3:

Now watch the video again but this time, record observations you see while it's hatching.

Activity 4:

Research how long it takes for the chick to become a hen.

Activity 5:

Create your own timeline starting at the egg being laid and finishing when the chick is a fully grown hen, draw the chick at each stages of it's life.
