

Science Lesson 2 Monday 27th April:

In Science we would have been focusing on the topic 'animals including humans'. The second lesson is to understand that babies can be similar or different to their adults.

Activity 1:

Watch BBC clip: <https://www.bbc.co.uk/bitesize/clips/z8x76sg>

Activity 2:

Watch video again and list the animals that are born looking like their adults and another list of animals that look different to their adult,

Activity 3:

Create a table and sort animal into 'looks like their adults from birth' and 'looks different to their adult from birth'. You can use the examples from the video or research some of your own examples. You could write or draw each animal in the right place. For an example, have a look at the table on the next page that I have started.

Animals that look like their adult from birth

Animals that look different from their adult from birth
