

Geography Project

In Geography, we are focusing on the 7 continents and 5 oceans of the world. To make the workload more manageable, we are doing a Geography project so you can work at your own pace.

Your mission is to research the names and location of each continent and ocean and create your own map of the world showing where they are. It would be great if you could research different countries that are in each continent too.

Extension task (you don't have to do this):

Plan a holiday in another country, look on your map and discuss the continents and oceans you would fly over in an aeroplane to get there.

I will really look forward to seeing all the amazing projects that you create!
