

## Maths Lessons - Monday 20<sup>th</sup> July and Wednesday 22<sup>nd</sup> July

As we would usually be playing recap games in Maths at this point in the school year, I would like you to have a go at making your own recap game. You can choose to focus on one of the four operations; addition, subtraction, multiplication or division. You could make a board game or invent your own game to play with a family member but it must involve one of the four operations. Please see examples below of the kind of board game you could make:

|                       |         |                          |         |                          |
|-----------------------|---------|--------------------------|---------|--------------------------|
|                       | 20 - 10 | Move forward one place!  | 20-13   | 15 - 4                   |
|                       |         |                          |         | 18 - 16                  |
| 20 - 12               | 19 - 15 | 100 - 78                 | 13 - 12 | Miss a turn!             |
| 16 - 10               |         |                          |         |                          |
| Go back three places! | 20 - 16 | Move forward two places! | 16 - 12 | 17 - 15                  |
|                       |         |                          |         | 17 - 10                  |
|                       | 19 - 14 | 14 - 12                  | 20 - 11 | Move forward two places! |
